

HUMAN INTERFACE

HELLER BOCK
6.2%

Human Interface is a well hopped Heller Bock. This German lager is often brewed to usher in spring and the joy felt in coming together face to face after a long dark winter. This bigger version of a Helles has softer bitterness than a pilsner with bigger hop punch. Floral and bready and a first for both Donzoko and Duration. We recommend drinking in abundance with crisps and good company. Go on get your Stein out!

TASTING NOTES
Bready Malt | Soft | Floral
